Xtra Range Technology, Wide Wi-Fi Coverage

Compared with the traditional AX3000 router, the Xtra Range Technology has one more 5GHz antenna (1*dual-band antenna + 2*5GHz antennas). Through the 3T3R multi-antenna, multi-path optimization design, and Beamforming signal enhancement technology, the signal strength of the 5GHz frequency band can be greatly improved for broader coverage.
OFDMA More Device, Less Congestion

X6000R can easily handle dozens of devices streaming and gaming at the same time—OFDMA, greatly increases capacity by 4 times to enable simultaneous transmission to more devices. OFDMA separates a single spectrum into multiple units and enables different devices to share one transmission stream, increasing efficiency and reducing latency.

Easy Mesh, Wider Coverage and Seamless Roaming

With advanced Mesh technology, units work together to form a unified network with a single network name.Devices will automatically switch between X6000R as you move through your home for the fastest possible speeds.
